Temperature Controlled Vehicles

Euro Foods

Solomon Commercials have developed what they hope to become a successful and long lasting partnership with Euro Foods, a major force in supply to the takeaway market.

Beginning with a wish to develop two 26T vehicles that were designed specifically with their requirements in mind, Euro Foods and Solomon's worked closely together on the specification of the vehicle, enjoying significant input and idea development from both parties.

The Benefits

Due to the nature of Solomon's business being able to cater for any needs and requirements, Euro Foods were able to see exactly what they would be receiving upon build completion and how it would fit within their operation. It was this attention to detail and thoroughness, even down to exact door positions and apertures that lead to the build of the two 26T vehicles that they operate today.

Because of all the development and design work early on, both vehicles were completed and arrived with Euro Foods without issue, and were able to be put straight to task in their fleet. With Solomon's Slipstream body design and the smart new 'Kukd' livery, the new vehicles portray a modern, dynamic image on the road, perfectly aligned with Euro Foods Groups' rapidly growing business.

Neill Cannell, of Euro Foods, has been very happy with the relationship;

'Solomon's professionalism and attention to detail has allowed us to develop a bespoke truck to match our requirements exactly'.

With such a successful first build programme, Solomon and Euro Foods have continued their partnership, with 5 new 18T Undermount vehicles built earlier in 2016, along with a further 10 7.5T vehicles.
