

Solomon
Temperature Controlled Vehicles

Streamlining Deliveries

Solomon Commercials are proud to have supplied **Hannah Food Service** with five new 7.5t temperature controlled vehicles which are the first 7.5t weight category vehicles to feature Solomon's registered Slipstream aerodynamic design for fuel saving.

The Benefits

As well as the aerodynamic benefits, the design sets Hannah Foods vehicles apart on the road and along with their striking livery, their trucks demonstrate the companies modern and forward thinking approach.

The bodies have been built to the exceptionally high standards Solomon Commercials are renowned for and also feature cameras to the front, side and rear, ensuring the driver has maximum visibility.

Internally, the vehicles offer flexibility of use to maximise efficiency, with a Solomon designed movable and storable bulkhead, allowing for transportation of single temperature or twin temperature loads. Solomon's design capability allow this multi temperature operation to be achieved with a traditional single temperature fridge, with ducting married with a thermostatically controlled fan kit designed within the vehicle, to efficiently direct the airflow to where it is needed.
