Solomon Work with Petit and Anglia Crown to supply 9 New Bodies

Solomon Commercials are proud to have worked with Anglia Crown and Petit Forestier to supply 9 new vehicles to the Anglia Crown fleet.

The Benefits

Comprising 2 x 7.5t, 5 x 12t and a further 2 x 18t vehicles, Solomon commercials sales managers and technical team worked closely with both Petit Forestier and Anglia Crown to develop a solution that would best suit the customer's operation and challenges they face in their day to day environment.

All three specifications are dual temperature with Carrier fridge units, Solomon's movable/stowable bulkhead allowing for easily adjustable compartment sizes or a fully open single temperature load space. The bulkheads feature a central access door that, along with a tail-lift, allows all deliveries to be made through the rear aperture reducing and risk of a number of health and safety concerns.

Externally, all three specifications feature a rear loading flood light which will provide illumination for early/late deliveries and during the long winter months.

Paul Robinson (Distribution Manager) said: 'Having worked with Solomon previously and knowing the quality of their product, I had no hesitation in stipulating their bodies for our next set of requirements and I have not been disappointed.

Their team were thoroughly accommodating and professional in their approach and have once again produced great vehicles for our drivers to enjoy.'
